SUMMARY OF TABLES.

In 1904 there were received 51,168 applications for mechanical patents, 818 applications for design patents, 157 applications for reissues of patents, 2,524 applications for registration of trade-marks, 1,335 applications for registration of labels, and 397 applications for registration of prints. There were 30,824 patents issued, including designs; 110 patents reissued, and 2,158 trade-marks, 1,114 labels, and 297 prints registered. The number of patents that expired was 20,429. The number of allowed applications awaiting the payment of final fees was 9,362, and the number forfeited for non-payment of the final fees 5,413. The total receipts were \$1,657,326.53; the expenditures, \$1,476,000.38, and the surplus of receipts over expenditures, \$181,326.15. The total balance to the credit of the Patent Office in the Treasury of the United States on January 1, 1905, was \$5,863,866.76.

In proportion to population more patents were issued to citizens of Connecticut than to those of any other State—1 to every 1,097. Next in order are the following: District of Columbia, 1 to every 1,146; Massachusetts, 1 to every 1,351; Colorado, 1 to every 1,394; New Jersey, 1 to every 1,452; California, 1 to every 1,453; Rhode Island, 1 to every 1,509; New York, 1 to every 1,614; Illinois, 1 to every 1,673; Washington, 1 to every 1,693; Ohio, 1 to every 1,908; Pennsylvania, 1 to every 2,064; Michigan, 1 to every 2,543; Montana, 1 to every 2,561; Oregon, 1 to every 3,086; Oklahoma, 1 to every 3,264; Missouri, 1 to every 3,301;

Wyoming, 1 to every 3,304; Minnesota, 1 to every 3,474; Iowa, 1 to every 3,481; Wisconsin, 1 to every 3,555; Indiana, 1 to every 3,569; Arizona, 1 to every 3,841; Vermont, 1 to every 3,949; Maryland, 1 to every 4,117; Utah, 1 to every 4,130; Nevada, 1 to every 4,233; Kansas, 1 to every 4,376; South Dakota, 1 to every 4,724; Nebraska, 1 to every 4,749; Idaho, 1 to every 4,758; Delaware, 1 to every 4,992; New Hampshire, 1 to every 5,415; Maine, 1 to every 5,739; West Virginia, 1 to every 6,030; North Dakota, 1 to every 6,382; New Mexico, 1 to every 6,510; Florida, 1 to every 6,954; Texas, 1 to every 7,346; Virginia, 1 to every 7,957; Kentucky, 1 to every 8,420; Tennessee, 1 to every 9,486, and Georgia, 1 to every 9,983. The fewest patents granted in proportion to the number of inhabitants were in the following States and Territories: Alaska, 1 to every 31,720; Hawaii, 1 to every 22,000; South Carolina, 1 to every 19,147; Mississippi, 1 to every 17,236; North Carolina, 1 to every 15,272; Arkansas, 1 to every 13,115; Alabama, 1 to every 12,613; Indian Territory, 1 to every 10,887, and Louisiana, 1 to every 10,084.

As to foreign patents, 910 were granted to citizens of Germany; 830 to those of England; 412 to those of Canada; 331 to those of France; 119 to those of Austria-Hungary; 87 to those of Switzerland; 80 to those of Scotland; 73 to those of Sweden; 53 to those of New Zealand; 48 to those of Victoria; 42 to those of Belgium; 37 to those of Russia; 28 to those of Mexico; 26 to those of Ireland; 25 to those of New South Wales; 23 to those of Norway; 22 each to

those of Denmark and Italy; 20 to those of the Netherlands; 11 to those of Spain; 10 each to those of India and Transvaal; 7 to those of Queensland; 5 each to those of Argentina, Cuba, South Australia, and Western Australia; 4 each to those of Japan and Turkey; 3 each to those of Brazil, Costa Rica, and Newfoundland; 2 each to those of Cape Colony, China, Natal, Roumania, San Salvador, and Tasmania, and 1 each to those of Africa, Bermuda, Colombia, Ecuador, Guatemala, Isle of Man, Java, Persia, Peru, and Portugal.

The condition of the examining divisions upon December 31 is indicated by the fact that of the 38 divisions 20 were then taking up new cases for action within one month from the date of filing, 10 were in arrears between one and two months, and the remaining 8 between two and three months. The total number of cases awaiting action on the part of the Office upon December 31 was 14,608.

The work of this Bureau is in a satisfactory condition. In some respects results have been obtained in the past year which have been for a long time desired. Among these I would mention:

CLAIMS OF LOSS.—Claims of losses of cash transmitted by mail to this Office as they existed prior to September, 1901, have been almost eliminated. This appears by the fact that while the aggregate amount of alleged losses for 1900 was \$728.40, and for the first eight months of 1901 \$387.64, the measures adopted and put into effect in August of 1901 have reduced these claims of losses to \$28.10 for the period of three years and four months from September 1, 1901, to December 1, 1904. The total receipts passing through the mail-room in 1903 were \$947,556.88. Complaints of losses for this period aggregated \$2.95. The corresponding items for 1904 were: Total receipts, \$1,020,700.87; total alleged losses, \$3.85. These claims of losses included claims erroneously made as well as losses attributable to the mail service.

OFFICE ERRORS.—The sums which were formerly paid for errors entitled "Office Errors" in the preparation of patents for publication have been entirely eliminated by the substitution of more careful methods and the determination of individual responsibility. The annual cost of these errors for some recent years is as follows:

Year.	Number of errors paid for.	Annual cost.
1887-88.....	774	\$1,176 48
1888-89.....	774	1,176 48

*None that were productive of expense to the Office.

REPRODUCTIONS.—Careful exploration work among the printed patents in this Office and development of hitherto lost resources of printed patents have resulted in a saving from the amounts which would otherwise have been required for the purpose of reproducing exhausted copies estimated by the Chief Clerk at \$39,030.40.

PROMPTNESS.—The clerical work of this Office in the matter of prompt transaction of its correspondence, in furnishing printed copies of patents and manuscript copies of its records is more prompt than at any time in its recent history in spite of the growth of these classes of work to unprecedented figures. This has been accomplished without any corresponding increase in the number of employees by improvement in methods of work and in standards of individual performance.

MODELS MOVED.—During the summer of 1904 eighty-three iron model-cases and about twenty-five thousand models were removed from the galleries of the Patent Office to the second floor of the Union building. This leaves less than one hundred models in the Patent Office building, and they will be removed to the Union building very shortly. The space formerly occupied by these cases is being used for the storage of printed copies of patents, patented files, and other official records.

CONTRACT WORK.—The year 1904 witnessed a renewal of competition among contractors for the photolithographic work of this Bureau and resulted in a contract being made with a new contractor. This work has been performed promptly, has been of a high standard, and with a material reduction of expense.

CLASSIFICATION.—The work of the Classification Division is steadily progressing, and a new edition of the Classification of Inventions will soon be ready for publication.

NEW TRADE-MARK ACT.—The trade-mark measure now before Congress will, if it becomes a law, undoubtedly result in an increase in registration of trade-marks in this Office and will require an increase of facilities both in the force employed and in space and equipment required for its transaction, due to the considerable reduction of trade-mark fees provided by this measure.

SPACE.—This fact, as well as the general progress of our work, requires me again to call your attention to the fact that this Office requires more space than is at present available for the convenient and satisfactory performance of its work.

Respectfully submitted.

FREDERICK I. ALLEN,
Commissioner of Patents.
